# In Person Meetings Postponed

I apologize for the long e-mail, please take a moment to read!

It saddens me to send this email, but just as we feel like we're out of the woods with Covid to meet in person again, variants start popping up.

Club officers held an emergency meeting last night and with the help of your generous time in filling out our survey we came to the conclusion to NOT meet in-person starting Thursday August 26th. Instead, we have decided to resume virtual only meetings until a time comes that we can ensure the safety and comfort of our members. Even with our in-person and virtual hybrid plan, we just didn't have enough members wanting to meet in-person to justify the insurance and taking up the room in the church.

Our first meeting will be streamed LIVE on Thursday August 26th at 7pm EST and weekly thereafter on our Facebook page here:

[www.facebook.com/groups/arundelcameraclub/](https://www.facebook.com/groups/arundelcameraclub/)

Please continue to join us and all the great programming your officers have worked very hard on providing that will now be adjusted for a virtual only experience. It is our plan to re-assess Covid on a month by month basis and make an informed decision on when we can safely resume meeting in-person with our original hybrid plan again.

For our second virtual year I ask for the generosity in our paid members to renew their paid membership or if you're new, considering becoming a paid member which not only help cover our costs to bring great

programming to you, but also the ability to participate in contests with great learning opportunities, ribbons and end of year recognition! This year we're also bringing in professional critique opportunities to paid members thanks to the hard work of our Contest Chair, Ron. While programs are a big help, contests and critiques are the number one way to jumpstart your photography with personalized comments on your art no matter what your skill level.

To become a member or renew, please visit:

<https://arundelcameraclub.org/membership/>

On a personal note, I know this will be disappointing to some, especially the few I've talked to privately who have had a pretty rough time with the last two years. Nobody wants in-person meetings more than I do, I encourage you to get out and safely practice your art. Attend our field trips, meet & shoots and this weekend is our annual outdoor Summer Picnic! Keep positive and please reach out to friends, family, other members, me or your club officers if you're having a particularly tough time and need to talk to someone. The Arundel Camera Club family has become stronger through this and we'll all get through it together. I appreciate every single one of you who has stuck with us through these strange times and know that your participation in the live streams, contests, and your friendliness to other members and contribution on the Facebook group makes me extremely proud of our community.

# 2021-2022 Contest Themes

## Reflections (October)

Reflection photography, also referred to as mirror photography, is when you use reflective surfaces to create an artistic echo of a scene. This type of photography can add an interesting spin to locations that are hotspots for photographers such as oceans, lakes, puddles, and even rain drops. They're all subjects that are commonly used to create brilliant reflection photographs. Of course, less traditional resources such as metal, tiles, mirrors and anything with a shiny surface can also be easily incorporated into this type of photography. The reflection may or may not include the subject which is being reflected. Click here for examples of [Reflections Photography](#).

## Interesting Perspectives (December)

Perspective in photography is defined as the sense of depth or spatial relationship between objects in a photo, along with their dimensions with respect to what viewer of the image sees. By changing perspective, subjects can appear much smaller or larger than normal, lines can converge differently, and much more. The most common and often least interesting perspective is "eye level." At first we were going to define Interesting Perspectives as "Anything NOT at Eye Level". Try these (1) Shoot down on your subject. (2) Shoot up at your subject. (3) Lie down and shoot from ground level. Click here for examples of [Interesting Perspectives Photography](#).

## Abstract (February)

This category should include images that are in some way altered from the usual way it is viewed. The photograph can concentrate on color, form, texture, pattern, line or other aspect of the object. The subject of the photograph may be an identifiable object, but should be rendered in a way that the identity of the object is secondary to aspects of form, color (or tone), lines, shapes, or texture. That is, the subject may be recognizable, but the photograph should not be representational. The distinction can be subtle, and ultimately will reside with the judge. Click here for examples of [Abstract Photography](#).

## Architecture (April)

The subject should be a building, group of related buildings, or other man-made structure such as a bridge or tower or a portion thereof. Both interior and exterior photographs are allowed. Images may focus on the structure as a whole or a part of it. Click here for examples of [Architecture](#).

# Club Information

## Meeting Nights

Starting August 26, the Arundel Camera Club meets every Thursday evening from 7:00 PM until 9:00 PM. Due to COVID-19 we will be broadcasting our live meetings to FaceBook.

Meetings are open to the public, but only dues paying members may enter competitions and participate in critiques. Meetings alternate between programs of informative speakers, photographic assignments, and photographic competitions. Competitions give us a chance to show off our work and to get constructive critiques from our judges. Ribbons are awarded for first through fourth place and honorable mention. Normally we have competitions for color prints, monochrome prints, and digital images. Currently we are only holding digital competitions. Competitions are held for both novice and unlimited club members. Awards are awarded at the end of year banquet. The club also has monthly photographic field trips to locations of interest. This is a chance to go out and practice what we learned during programs, a time to socialize with other club members, and a chance to do a little photographic exploration.
